# 6691A

## Alemlube Automotive Semi-Automatic Tyre Changer

The Alemlube Automotive U-6691A automatic tyre changer is a technologically advanced, robustly constructed machine and features a semi automatic pneumatic tilting column that is locked at the desired position and quick air booster designed to be particularly useful for low profile tyre changing.

The higher column and wider machine cabinet increase the working coverage making the U-6691A more convenient for demounting and mounting operations and generally saving the time involved.

The quick air booster ensures that the tyre and rim are jointed instantly which is especially suitable for working with low profile tyres. The four angle directional tyre pressing shovel is another great advantage of the U-6691A for pressing various low profile tyres from different angles.

Perfectly described as bigger and better, the U-6691A automatic tyre changer from Alemlube Automotive with its superior strength and its gear box & motor energy saving feature is sure to increase tyre demounting/mounting efficiency in your workshop on a daily basis.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Semi automatic pneumatic tilting column

Large 26" turntable and high power motor

Quick air booster suitable for low profile tyres

Outside clamping: 12" - 26"

Inside clamping: 14" - 28"

Air supply: 8bar

Working pressure of 116-145psi (8-10bar)

Bead breaker force: 5511kg

Noise level: <75dB

Maximum wheel diameter 45" (1143mm)

Maximum wheel width 16" (406mm)

Four angle adjustable tyre pressing shovel

Weight of 271.7kg
