413082 Grease Control Valve - Flexible Extension with Z Swivel

August 2021

The 413082 Grease Control Valve with Z Swivel is precision engineered by Samoa in Spain and its ergonomic body and trigger are designed to reduce operator hand fatigue as it operates at genuine high pressure.

Manufactured in aluminium with a steel insert, the maximum working pressure of 7,150psi (500bar) ensures efficient grease delivery during a long service life.

Partially depress the trigger for a shot of grease and fully depress the trigger for a continuous flow. Supplied standard with a flexible outlet and 3 jaw coupler, the 413082 Grease Control Valve with Z Swivel available from Alemlube is a valuable and reliable tool for all your high pressure greasing applications.

SPECIFICATIONS, FEATURES AND BENEFITS

- Genuine high pressure performance
- Maximum working pressure of 7,150psi (500bar)
- Reduces operator hand fatigue
- Single shot or continuous flow option
- Flexible outlet with 3 jaw coupler
- 1/4" BSP(f) inlet thread
- 1/8" BSP(f) outlet thread

413080

Also available with rigid extension & Z swivel
