

Heavy Duty Lubrication Systems for Hydraulic Hammers

- **Installs directly on the hammer**
– the ideal solution for interchangeable attachments!
- **No modifications to excavators required**

KEY FEATURES

- Continuous lubrication of the hammer during operation
- Hydraulically operated lubrication system
- Installation directly at the hydraulic hammer – the ideal solution for the use with different carrier machines
- Connects to the hydraulic system by teed connections in the hammer hydraulic lines, or by flange mount direct on the hammer
- Suitable for special lubricants like copper chisel lubricant
- Suitable for hydraulic systems without pressure relief
- Actuated by a powerful hydro motor and not by a progressive distribution system
- Output adjustable as required
- Heavy duty design – most reliable system

HAMAX2 and Kompakt Specifications

- Operation: Hydraulic
- Hydraulic input pressure: 90 to 250bar
- Maximum hydraulic back pressure: 20bar
- Maximum hydraulic flow: 2L/min
- Default cycle speed: 14 cycles/min
- Grease flow rate: 0.12cc/cycle
- Maximum grease pressure: 280bar (by relief valve)
- Connection: 1/4" BSP or by flange
- Lubricant types: Approved copper chisel pastes or EP2 greases

HAMAX2

The original HAMAX2 is robust, reliable and flexible. It has interchangeable cartridge holders to allow the use of different chisel paste cartridge designs. It also has more flow adjustment for very small hammers and special applications. Available in M14 and M16 mounting bolt sizes.

Hamax2 is available in the following models:

CARTRIDGE TYPE	CARTRIDGE	BOLT SIZE	PART No.
Hamax2 Version S	with	M14	25760010202
Hamax2 Version F	with	M14	25760020202
Hamax2 Version L	with	M14	25760030202

257660020202
HAMAX2 standard - standard version Type F (with Fuchs Meissel paste cartridge)

HAMAX Kompakt

HAMAX Kompakt is a smaller and lower cost version of the HAMAX2. It uses the same reliable design and key components, but in a smaller housing without the option to change the cartridge holder.

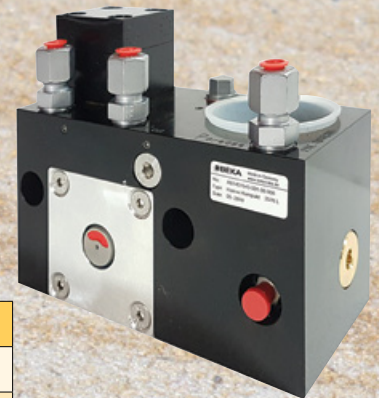

The HAMAX Kompakt comes in three varieties

Type S (Standard BEKA cartridge, M14 mounting bolts)

Type L (Lincoln/SKF type cartridge, M16 mounting bolts).

Hamax Kompakt is available in the following models:

CARTRIDGE TYPE	CARTRIDGE	BOLT SIZE	PART No.
Kompakt Version S	without	M14	10118473
Kompakt Version F	without	M14	10133304
Kompakt Version L	without	M16	2576KL00202

2576KL00202
HAMAX KOMPAKT TYPE-L

BEKA Chisel Copper Paste Cartridges

BEKA Chisel Copper Paste Cartridges are filled in Germany with premium copper chisel paste and they are available in 3 models:

Type S – BEKA Standard

Type F – Fuchs Standard

Type L – Lincoln/SKF Standard

CARTRIDGE TYPE	SIZE	PART No.
Type S – BEKA Standard	400g	0320091
Type F – Fuchs Standard	500g	10119916
Type L – Lincoln/SKF Standard	400g	10135218
