INFORMATION

AA35S

3.5t Full Rise Low Profile Scissor Lift

35mm rubber block

75mm rubber block

September 2023

The AA35S 3.5 tonne full rise low profile scissor lift has been designed and engineered specifically to suit workshops with limited space.

Manufactured with a hydraulic pressure presetting function which avoids raising a vehicle that exceeds the rated capacity of 3,500kg, the AA35S has a maximum lifting height of 1930mm with a minimum lifting height of 105mm.

Featuring an advanced durable and space saving compact design. The AA35S 3.5 tonne full rise low profile scissor lift has an hydraulic system that keeps both platforms level.

The AA35S is a functional, reliable and profit generating addition to any busy automotive workshop. And for greater flexibility, the AA35S 3.5 tonne full rise low profile scissor lift is equipped with a 415V three phase motor, an automatic lubricating system and oil-less bearings.

Also available is the exact same model as a 240V version with a single phase motor (AA35S-240V).

SPECIFICATIONS, FEATURES AND BENEFITS

- Lifting capacity of 3,500kg
- 415V three phase motor
- 2.2KW aluminium motor
- Supplied standard with 35mm & 75mm thick rubber blocks
- Platform size: 1485 x 2105 x 660mm
- Maximum lifting height of 1930mm
- Lowered height of 105mm
- Raising speeds: Up: ≤60 sec. Down ≥40 sec.
- Automatic lubricating system and oil-less bearings
- Dual hydraulic locking system
- Noise: ≤70dB (A)
- Australian WORKSAFE compliance
- Design Registration: WAH22060
