ALEM-6100 Tank Level Web Monitor

The Alemlube ALEM-6100 Tank Level Web Monitor is a low cost battery powered tank gauging system with unique remote monitoring that can be used in an unlimited number of applications where tank level information of unattended locations is required. A local indication at the tank is also retained.

The ALEM-6100 utilises the latest possible technology to send data to www.yourgauge.com via GPRS, GDSP or GSM mobile network enabling communication with remote equipment from any distance and any location worldwide without the need, inconvenience or expense of cabling. Data can be reported daily, weekly or monthly and allows users to subscribe to reports depending on their preferences. Each user can setup multiple email addresses and include low level alert emails.

The Alemlube ALEM-6100 Tank Level Web Monitor has an IP65 weatherproof enclosure and a five year battery life.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS
