

PR025-012AD

12V GPRO Diesel Pump with Automatic Nozzle

April 2021

The GPI PR025-012AD 12V Diesel Pump with Automatic Nozzle is a high pressure diesel pump with cast iron body and long life carbon vanes, engineered to deliver.

Completely portable and weather resistant thanks to a durable and corrosion resistant powder coated body, the PR025-012AD Diesel Pump is ideal for use with or without a hose reel and is typically valuable for road contractors, broad acre farming, mining equipment, excavators and any large piece of equipment where time-saving refuelling equates to increased productivity.

Also designed, tested and approved for use with other flammable liquids including petrol blends and kerosene, the PR025-012AD 12V Diesel Pump with Automatic Nozzle is supplied standard with fitted 5.5m power cord, telescopic downtube, 5.5m long delivery hose and dispenses up to 94 litres per minute at an operating pressure of 20psi (1.4 bar).

Designed and engineered for maximum reliability and efficiency, the PR025-012AD is assured to provide the longest possible service life when operated and maintained according to the manufacturer's guidelines.

SPECIFICATIONS, FEATURES AND BENEFITS

- 12VDC operation
- Carbon vanes
- Automatic shut off nozzle
- 5.5m x 1" ID delivery hose
- Fast refuelling flow rates of up to 94L/min
- 20amp current draw
- 1" NPT inlet and outlet connections
- 2" NPT drum bung connection
- 1" NPT telescopic downtube up to 101cm
- 5.5m long cable & plug
- Duty cycle of 30 minutes on, 30 minutes off
- Operating temperature from -29°C to +52°C

Also available:

PR025-024MD as above but with manual nozzle
