# SP100010

## 12V Chemical Spray Pump

The EL Series SP100010 12V chemical spray pump is an automatic pump ideally suited to agricultural or marine spraying duties producing flow rates of up to 2.6 L/min at a pressure of 35psi.

Conveniently transported on site due to its compact size, the SP10010 is self priming and therefore can be located above a fluid tank. A built in pressure switch automatically starts and stops the pump when a tap is opened and closed.

The user can be confident in knowing that the SP100010 can run dry for extended periods of time and is further safe guarded by a built in thermal protector.

Alemlube can also supply the pump with an on/off switch (SP100020).

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Convenient compact design

12VDC operation

Flow rates of up to 2.6 L/min

Operating pressure of 35psi (2.4 bar)

Automatically starts when a tap is turned on

Self-priming for unrestricted pump positioning

Can run dry for extended periods of time

Built in thermal protector

Ideal for agricultural chemical spraying

Also suitable for spraying water

Also available with an on/off switch - Part number SP100020
