52005A

Piusi 24V High Flow Diesel Drum Pump Kit

November 2021

The Piusi 52005A 24V High Flow Diesel Drum Pump Kit is designed to transfer diesel fuel directly from 205L drums.

The 52005A is supplied complete with 4m x 1" hose, auto nozzle (51039), 4m cable & clamps and is capable of high flow diesel transfer and mobile refuelling at rates of up to 75L/min free flow.

Easy to install on the drum via the 2" bung adaptor, the 52005A with telescopic downtube operates safely with a duty cycle of 30 minutes on & 30 minutes off.

The Piusi 52005A 24V High Flow Diesel Drum Pump Kit is a self-priming rotary vane, positive displacement type transfer pump facilitating convenient & instant refuelling.

Thanks to its refilling speed and its low voltage, this Piusi diesel pump kit is suitable for refuelling plant equipment and vehicles in the agriculture, construction, automotive and marine sectors where mains power may be unavailable.

The Piusi 52005A 24V High Flow Diesel Drum Pump Kit is the ideal dispensing kit for on demand, on site applications ensuring plant and equipment a seamless flow of productivity.

SPECIFICATIONS, FEATURES AND BENEFITS

- Flow rates of up to 75L/min
- 1" BSP(f) inlet/outlet
- Heavy duty reliability
- 24V - 21amp, 2,000rpm
- 4m x 1" hose
- Automatic shut off nozzle
- Supplied standard with 4m cable & clamps
- Duty cycle of 30 mins on / 30 mins off
- On demand refuelling
- Weight of 10.4kg
- IP55 rating

I have attached two PI's for the existing products

- 52005 also available with manual nozzle, 85L/min
