

## PRODUCT INFORMATION

August 2015 Update

# 20011 Mini Workshop LED Light

The Alemlube 20011 mini workshop LED light is ideal for the professional mechanic or tradesman and home handyman alike.

Extremely compact, the 20011 has been designed to fit into pockets for quick and convenient access and incorporates a handy pocket clip and integrated magnet for hands free operation.

Manufactured with a durable weatherproof rubberised housing and a rubber on/off switch that allows switching between two light modes – bright illumination with a wide and even spread of light or a torch beam for direct illumination.

Four hours of continuous use is possible at peak output utilising the seven high intensity LEDs for wide illumination and thirty five hours when used in torch mode only.

Supplied complete with a rechargeable battery (2 hour recharging time) with no memory effect and 240V AC charger, the 20011 mini workshop LED light produces a powerful light source for a smooth & even light output as well as providing a bright direct beam for when close inspection is required.
