

561611PK

Mobile Oil Transfer Pump with Carry Frame

April 2023

The 561611PK 240V Portable Oil Transfer Pump is a high performance gear pump directly coupled to an electric motor with IP54 protection for the transfer or distribution of large volumes of lubricants. Pump gears are manufactured in steel and pump body is manufactured in cast iron. The pump includes adjustable by-pass valve and on/off switch.

The 561611PK Mobile Oil Transfer Pump is recommended for pumping high viscosity oil up to ISO VG 1500 cSt and has an IP54 protection for minimising dust ingress.

The 561611PK Mobile Oil Transfer Pump is mounted to a 10mm flat aluminium base surrounded by a sturdy aluminium tube frame and the on/off switch is mounted to an aluminium plate.

The carry plate and frame sits on four heavy duty rubber feet making the 561611PK easy to carry and extremely portable in any application.

SPECIFICATIONS, FEATURES AND BENEFITS

- Electric motor: 240V, single phase, 2kW
- Flow rate of up to: 70L/min
- Maximum pressure: 116psi (8bar)
- Inlet: 1" BSP
- Outlet: 1" BSP
- Fluid: clean oil only up to 1,550 cSt
- Sturdy aluminium carry frame
- Heavy duty rubber feet
- Dimensions: 600mm (L) x 380mm (H) x 300mm (W)
- Weight: 32kg
