

L400504017AAM

## Lockable Diesel/AdBlue® Storage & Dispensing Kit

November 2020

**The L400504017AAM Lockable Diesel/AdBlue® Storage & Dispensing Kit consists of a 400L diesel tank kit and a 50L AdBlue® tank kit in one complete unit.**

Manufactured of HDPE for the safe transportation and dispensing of both diesel fuel and AdBlue®, the L400504017AAM can be safely secured in the back of a ute, van or truck utilising the in-built recesses for tie-down straps and six handles for positioning.

The lid of the L400504017AAM has the ability to be locked for the security of diesel fuel, AdBlue® and valuable kit components. An opening in the front of the tank facilitates the use of the hoses and nozzles when the lid is closed.

The 400L diesel kit has a 12V, 15A, 180W pump with duty cycle of 30 minutes on / 30 minutes off and a flow rate of up to 40L/min with an automatic shut off nozzle.

The 12V 50L AdBlue® kit that can be lifted out for separate individual use as required and operates with a 30 minutes on, 30 minutes off duty cycle with a manual nozzle delivering up to 17L/min.

### SPECIFICATIONS, FEATURES AND BENEFITS
