51090 Diesel Fuel Dispenser Kit

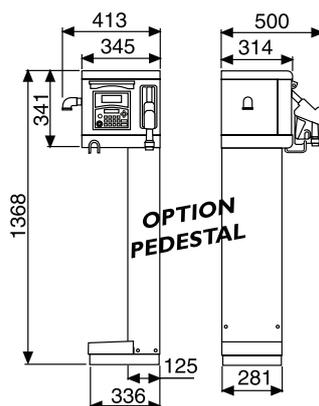

The 51090 diesel fuel dispenser kit is a multi-user product designed to cater for the non-commercial market demand for a dispensing unit complete with a pump, flow meter and automatic nozzle, management software, key kit including ten yellow user keys, one red manager's key, usb card reader and security padlock.

Capable of flow rates of up to 70 L/min the 51090 diesel fuel dispensing kit is easily interfaced with sophisticated fleet management systems and can be connected to an external electronic system and be enabled for dispensing to switch the pump on or off. Connection to a level switch is also possible in order to automatically switch off the pump in the event of a low tank level.

Additional keys and software can also be purchased separately either individually or as a software & key kit.

The 51090 is also available with a pedestal (51090P), 120 users version (51090-120), 12V version (51090-12V) and a 24V version (51090-24V).

All versions come complete and ready to go with the kit components as above.
