

SJ-120-002 2-Drum Spill Container

June 2020

The SJ-120-002 2-Drum Spill Container has been designed to accommodate two x 205L drums.

Ideal for static spill containment in manufacturing facilities, factories, warehouses, farm storage units and garages, the SJ-120-002 is manufactured from 100% recyclable PE and is completely stackable for transport and storage.

The durable, removable deck also allows drums to be placed in the container itself providing yet another usable function in protecting workplaces from hazardous spills.

The SJ-120-002 deck incorporates hand inserts and 25mm diameter viewing holes for inspecting collected fluid levels and also facilitates the insertion of a pump for convenient fluid evacuation.

Factory tested for weight and hydrostatic loads, each spill container meets all product and workplace regulations ensuring employee safety.

SPECIFICATIONS, FEATURES AND BENEFITS

- Innovative and efficient stacking and storage ability
- 100% recyclable polyethylene construction
- Fluid capacity of 230L
- Factory tested for weight and hydrostatic loads
- Non-skid removable deck
- Can be used without the deck and supports in place
- Deck incorporates hand inserts and holes for inspection and pump insertion
- Compatible with most forklifts and pallet trucks
- Fully recyclable, chemical resistant, UV stabilised PE
- Dimensions: 410mm (H) x 1200mm (W) x 800mm (D)
- Load weight of 800kg
