

AA226A

24" Tilt Back Tyre Changer with Helper Arm

August 2019

The Alemlube Automotive AA226A 24" Tilt Back Tyre Changer with Helper Arm is a technologically advanced, robustly constructed machine and features a pneumatic operated tilting column with helper arm and tubeless tyre inflating system.

Pneumatic locking of both vertical and horizontal distance and a tyre pressing roller contribute to superior efficiency of the AA226A Tilt Back Tyre Changer presenting the user with greater time management benefits.

A quick air booster ensures that the tyre and rim are jointed instantly which is especially suitable for working with low profile tyres. The large 24" turntable is another great advantage when the demand for low profile tyre changing is a high priority in the workshop.

Perfectly described as bigger and better, the AA226A Tilt Back Tyre Changer with Helper Arm from Alemlube Automotive with its 360° bending special rotary type shovel press, longer body and longer right helper is today's tyre changer of choice.

SPECIFICATIONS, FEATURES AND BENEFITS

- Fully automatic pneumatic tilting column
- Tubeless tyre inflating device
- Large 24" turntable suitable for low profile tyres
- Maximum rim width 14" (355mm)
- Maximum tyre diameter 41" (1040mm)
- Helping arm with central locking device
- Tubeless tyre inflating device
- Outside clamping: 10" - 21"
- Inside clamping: 12" - 24"
- Bead breaker force: 2500kg
- High strength alloy pedal
- Air supply: 116psi (8bar)
