

AWP809

Compact Air & Water Hose Reel

November 2019

The Alemlube AWP809 Compact Air & Water Hose Reel is ideal for limited space applications in and around workshop environments when access to compressed air and water is essential.

Constructed in high impact polypropylene, the AWP809 features the latest design and manufacturing techniques and superior grade reinforced polyurethane hose.

Operating with a maximum working pressure of 145psi (10bar), the AWP809 Compact Air & Water Hose Reel is supplied complete with 9m x 8mm delivery hose, short lead in hose and a swivelling wall bracket measuring 325mm in length providing an extremely safe and stable support system.

Manufactured in Italy under high quality controlled conditions, the AWP809 contains a German made steel rewind spring ensuring trouble free performance, reliability and a long service life.

SPECIFICATIONS, FEATURES AND BENEFITS

- Compact in size
- Ideal for limited space applications
- High impact resistant polypropylene construction
- Supplied complete with 9m x 8mm ID polyurethane hose
- Maximum working pressure of 145psi (10bar)
- 1/4" BSP(f) inlet thread
- 1/4" BSP (m) outlet thread
- Steel mounting bracket allows 180° hose reel rotation
- German made steel rewind spring mechanism
- Wall or ceiling mountable
- Suitable for use with air and water
- Dimensions: 190mm (d) x 275mm (h) x 275mm (w)
- Weight of 3kg
