## SMOBIPLUS-M 240V Mobile Mechanical Welding Fume Extractor

May 2020

**The SMOBIPLUS-M 240V Mobile Mechanical Welding Fume Extractor is a compact and effective machine designed to extract and filter welding fumes with a 3m articulated arm to move closer to the work area.**

The fully mobile SMOBIPLUS-M provides the perfect solution for the removal and filtering of welding fumes from the industrial workplace and satisfies essential WH&S requirements.

The fume extractor consists of a sturdy epoxy powdercoated sheet steel frame, an electric fan unit with a statically & dynamically balanced blade impeller, an electronic control panel, a 150mm diameter aluminium articulated arm that can rotate 360° (enabling a work area within a radius of 2.80 metres).

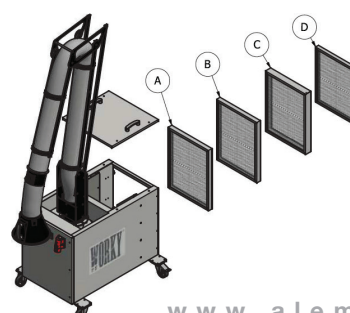

Filtering efficiency of up to 95% can be achieved with the set of 4 filters working hard to clear the air.

Alemlube also stocks the 4-filter sets consisting of a metal prefilter, a synthetic prefilter, a high efficiency filter and a final cell containing 5kg of activated carbon.

Protect your employees now and always keep a spare set of filters in stock to ensure optimal SMOBIPLUS-M operation and healthy working conditions.

### SPECIFICATIONS, FEATURES AND BENEFITS

- Premium welding fume extraction & filtering
- Weather resistant fan motor ensures a long working life
- Maximum airflow rated at 1,500 m<sup>3</sup>/h
- Filtering efficiency of up to 95%
- 240V power operating at 1.1Kw, 50Hz
- Easily replaced filters
  - A. Metal prefilter
  - B. Synthetic prefilter
  - C. High efficiency filter
  - D. Final cell with 5kg activated carbon
- Quiet operation at 72 dB
