## 180kg /205L Drum Trolley

The Alemlube 80180 180kg/205L drum trolley is heavy duty in construction and features a mechanical loading device to greatly assist the user in handling and moving drums up to and including 180kg/205L drums.

Clever design has produced a spring loaded lifting mechanism and repositionable top of drum securing bracket facilitating less effort in loading and carrying different drum sizes with a minimum height of 520mm. This feature combined with ergonomic, user friendly handles orientated at 45° result in a drum trolley that is truly versatile and extremely OH&S compliant.

Large 236mm diameter solid rubber composite wheels assist the manoeuvrability of the 80180 180kg/205L drum trolley and furthermore the trolley with drum on board can be left in a steady and angled position when having to open a door or clear a passage way for example, therefore allowing moving again without the effort required to angle the loaded trolley.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Labour saving spring loaded drum lifting mechanism

Repositionable drum securing bracket

Ergonomic 45° angled handles

A must for addressing OH&S compliance

236mm diameter/45mm wide solid rubber composite wheels

Also loads & carries drums with a minimum height of 520mm

Dimensions of 545mm (D) x 440mm (W) x 1490mm (H)

Weight of 25kg (packaged weight of 29kg)
