ESOC 900 Commercial Vehicle Oil Exchanger

The ESOC 900 Commercial Vehicle Exchanger is a revolutionary system that dramatically reduces your labour time and costs when changing your truck or other vehicles used oil.

Made and engineered in the USA, this exclusive and patented design keeps your trucks and vehicles out of the shop and on the road. In addition, it is safer for your technicians and environmentally safe thanks to its fully sealed, closed loop technology and automated system. The ESOC 900 Commercial Vehicle Exchanger provides you and your team with an alternative to traditional or conventional oil change approaches.

With the Quick Oil Change Technology, a 40 litre oil change can be completed in about 15 minutes, saving you approximately 40 minutes on every oil change performed. The unit uses air to purge the used oil from the vehicle's filter and oil passages while the oil pan is being evacuated, and replaces it with clean oil.

The oil change process is virtually automatic, which allows your technicians to perform other tasks while changing the oil. Speed, simplicity and productivity are the ESOC's key advantages and with these cost savings, the ESOC 900 will quickly pay for itself.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Environmentally safe oil change
Reduces labour time and costs – more time for trucks on the road
Automatically changes up to 40 litres of oil in around 15 minutes
Oil sample automatically drawn free from contamination
Eliminates operator contact with oil
Allows technicians to perform other tasks
Touch screen electronic controller with user friendly prompts
Spill-free fittings means zero mess
240V power source
Air supply 125psi @ 6SCFM
Fresh oil supply: Minimum 500psi
Dimensions: 142.24H x 55.88W x 60.96D cm
Weight: 159kgs
*Quick Connect Spill-Free Fittings sold separately

ESOC 900 Commercial Vehicle Oil Exchanger 5 STEP PROCESS

1. Connect
2. Program/Start
3. Purge/Evacuate
4. Change Filter
5. Introduce Clean Oil
