A14553

70cm Grease Gun Flex

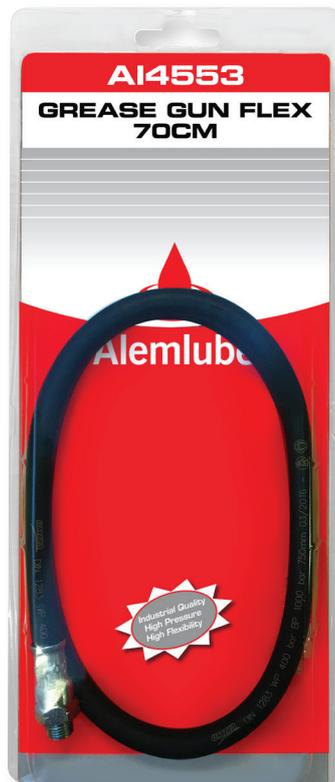

The Alemlube A14553 70cm grease gun flex has been added to the comprehensive range of grease gun flexes that are individually packaged for ease of displaying in your showroom or at the sales counter.

Alemlube grease gun flexes are true industrial quality, genuinely high pressure with a maximum burst pressure of 14,500psi (1,000bar).

The length of the flexes ranges from 200mm to 700mm and the flex is specified as either Polyamide or R1.

Primarily manufactured adhering to European standards, the grease flexes perform reliably day in, day out in the most demanding situations and conditions.

You can depend on Alemlube grease gun flexes to get the job done accurately, every time.
