EXP240

Pulsarlube 250cc Explosion Proof Grease Lubricator

The EXP240 Pulsarlube 250cc explosion proof grease lubricator has been specifically designed for safe use in environments where flammable gases or vapors are present in the air in quantities sufficient to produce explosive or ignitable mixtures.

Being the Electromechanical Industry's first highest explosion-proof certified lubricator (IECEX & ATEX & KCs & NEPSI Certified), the EXP240 is typically applied to electric motors & pumps used in petrochemical plants, transportation of crude oil/natural gas, hot/cold rolling equipment in the steel industry, cooling water treatment facilities in power plants, etc.

The Pulsarlube EXP240 can be installed to supply up to 8 lubrication points and is featured with selectable grease pouch capacity & dispensing periods, auto lock out mode to prevent unintentional mode changes and an easy to check LCD displays with backlight function.

NOTE: EXP240 is the main unit only.
Suitable grease pouches and batteries are sold separately.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Grease pouch capacity of 240ml (replaceable)

Dispenses 0.34ml/stroke @ 20°C

Dispensing periods of 1,2,3,6,9 and 12 months
