# 51060N

## Diesel Management & Control System

The 51060N diesel management & control system, complete with Self Service Desk software, permits the dispensing of diesel fuel for up to 80 users through passwords or i-button keys and calculates the consumption of each individual user. The multi-user control panel with K600/3 meter incorporates a key reader with USB socket for exporting data and an RS converter for direct connection to a PC via a cable up to a maximum length of 1000 metres.

Versatility is the clear benefit of the 51060N as it manages pump ignition, identification of authorised users, pre-selection of dispensed quantity, management of the pulse meter, of an external switch to switch off the pump when at the minimum level and of a micro switch connected to the nozzle support, in addition to the ability to connect to an external printer.

The 51060N diesel management & control system takes total control of your diesel fuel usage and record keeping.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Panel with dual display, keyboard and i-button reader

Data management software

Controls up to 80 users

Access via a PIN code or user key

Calculates consumption of each individual user

Supplies standard with 10 user keys, 1 manager's key and USB reader for PC

Inclusive of a K600/3 oval gear pulse meter

Local memory for up to the last 255 operations

Accepts vehicle registration number, kilometres, date & time of dispensing

Dedicated software for printing individual detailed summaries

240V power supply

Voltage: 35 watt, 6.5 Amp. Max.

Built in sliding display cover

Dimensions: 260mm (W) x 256mm (H) x 146mm (D)

Weight: 9kg

120 user model available on request
