

U-296

Alemlube Automotive Electro-Hydraulic Tyre Changer

March 2019

The Alemlube Automotive U-296 agricultural tyre changer has been designed and manufactured specifically to perform tyre changing operations on tractors, general farming equipment and for trucks and buses.

Electro-hydraulic operation of the U-296 agricultural tyre changer incorporates a moveable tyre platform controlled by a control unit and clockwise & anti-clockwise clamp rotation across a range of 14" to 42".

Versatile features include a portable console and a moveable control unit.

The combination of these features with reliable, sturdy construction ensures that the U-296 agricultural tyre changer can provide years of trouble free service and leads the way in today's large tyre changer category.

SPECIFICATIONS, FEATURES AND BENEFITS

- Electro-hydraulic operation
- Clockwise & anti-clockwise clamp rotation
- Moveable control unit
- Automatic fast turning
- Hydraulic motor with pressure adjustment device
- Portable console
- Handles rim sizes from 14" to 42"
- 2.2kW pump motor
- 2.2kW rotating motor
- Maximum tyre diameter of 1600mm
- Maximum tyre width of 980mm
- Maximum tyre weight of 1200kg
