# OP20L

## 20L Oil Drum Pouring Spout

The OP20L Alemlube 20L Oil Drum Spout Pourer is an ideal, economic accessory proving to be a must for any workshop that pours oil from 20L drums. Simply remove the lid on the 20L drum of oil, screw the OP20L Oil Drum Pouring Spout and pour the oil as required.

Not only does this simple but effective device give you total control over the sometimes tricky task of decanting oil, it also assists in avoiding costly waste and potentially hazardous oils spills in the workplace.

Supplied complete with a securely fitting cap that protects against foreign body contamination, the OP20L is easy to fit and then easy to unscrew and refit to the next 20L drum of oil.

Suitable for fitting to the 2" thread of both plastic and steel 20L drums, the OP20L Oil Drum Pouring Spout is high quality, well fitting and easy to clean when required.
