# U-226A Automatic Tyre Changer

The Alemlube Automotive U-226A automatic tyre changer is a technologically advanced, robustly constructed machine and features a pneumatic operated tilting column with helper arm and tubeless tyre inflating system.

Pneumatic locking of both vertical and horizontal distance and a tyre pressing roller contribute to superior efficiency of the U-226A automatic tyre changer presenting the user with greater time management benefits.

A quick air booster ensures that the tyre and rim are jointed instantly which is especially suitable for working with low profile tyres. The large 24" turntable is another great advantage when the demand for low profile tyre changing is a high priority in the workshop.

Perfectly described as bigger and better, the U-226A automatic tyre changer from Alemlube Automotive with its 360° bending special rotary type shovel press, longer body and longer right helper is today's tyre changer of choice.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Fully automatic pneumatic tilting column

Pneumatic locked optional position

Helping arm with central locking device

Tubeless tyre inflating device

Large 24" turntable suitable for low profile tyres

Outside clamping: 10" - 21"

Inside clamping: 12" - 24"

Air supply: 116psi (8bar)

Bead breaker force: 2500kg

Maximum wheel diameter 41" (1040mm)

Maximum wheel width 14" (355mm)

High strength steel pedal

Centering device keep the tyre and turntable in one concentric circle

Weight of 312kg
