# U-108

## Hand Spin Wheel Balancer

The Alemlube U-108 hand spin wheel balancer with precision main shaft and automatic data measuring function is versatile and operates with high balancing accuracy of  $\pm 1g$  due to low rotation speed measuring.

Suitable for balancing rim diameters from 10" up to 24" the U-108 is also suitable for mobile tyre service vehicle mounting.

A highly stable computer chip with self-calibration and self-diagnosis functions and five balancing modes equips the U-108 with everything required to perform fast and reliable wheel balancing for an extensive range of modern vehicles.
