- Assists with the removal of engines and transmissions
- Increases safety in the workshop
- One set includes 8 adaptors, 4 with a rubber head and 4 without

July 2022

The Alemlube Automotive AA49010 1,200kg Lifting Table is a multi-angle and multi-direction table providing a safe and efficient solution for under vehicle tasks such as engine transmission, hybrid battery and sub frame works to be carried out.

Connected to compressed air and operated by a foot control pedal to accurately raise and lower the platform, the AA49010 is safer and more user friendly than comparable manually operated lifting tables on the market.

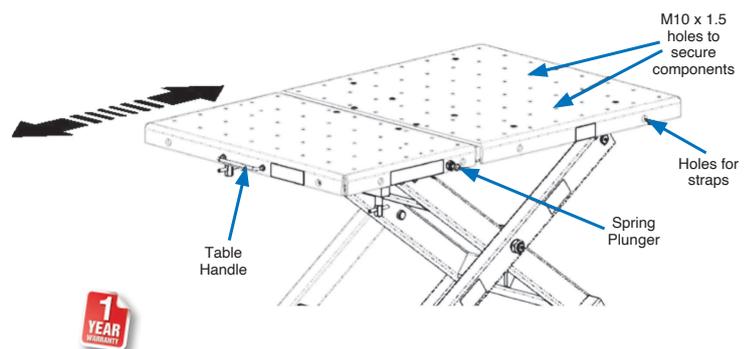

Versatility is the name of the game with the fine adjustment tilting feature of the AA49010 1,200kg Lifting Table allowing the user to finely tilt the platform to help remove or install vehicle components. This feature provides a total of 50mm of tilt at the front of the platform which helps compensate for uneven workshop floors or difficult fastener locations. and furthermore provides valuable technical assistance allowing most under vehicle tasks to be performed by one person.

Fully mobile, the Alemlube Automotive AA49010 is easily and effectively moved around due to swivelling castor wheels with integrated locking brake and large well positioned handle.

Furthermore, the matrix of holes located in the platform allow for vehicle specific tools to be secured to the table.

SPECIFICATIONS, FEATURES AND BENEFITS

- Lifting capacity of 1,200kg
- Lifting height of 1810mm
- Lowered height of 480mm
- Platform dimensions of 770mm x 1300mm
- Multi-angle, multi-directional adjustments
- Fully mobile
- Swivelling castor wheels with locking brake
- Supports large vehicle components with stability
- Promotes one person under car working independence
