

AA205-3D-G

Alemlube Lubrication Gantry

December 2021

The AA205-3D-G Alemlube Lubrication Gantry is a cost effective and versatile low maintenance oil delivery system designed for on demand oil dispensing whenever and wherever the need arises.

When combined with the Alemlube general range oil dispensing equipment as shown, the AA205-3D-G Lubrication Gantry saves space in your workshop and can be repositioned to any desired location within reach of compressed air.

Designed, engineered and manufactured by Alemlube in Australia, the AA205-3D-G is completely compliant with AS1554.1 and AS1940 standards resulting in longevity of practical service.

205L drums are safely supported by moulded fibreglass mesh platforms underneath which the steel bund with drain port is strengthened by substantial internal supports for stability and rigidity.

European manufactured Samoa oil pumps and metered control valves in addition to industrial quality oil hose reels facilitate accurate oil dispensing and the combination of the steel bund and oil drip trays ensure that oil does not end up on the workshop floor, further enhancing employee safety.

SPECIFICATIONS, FEATURES AND BENEFITS

- Designed to be a cost effective, low maintenance oil delivery system
- Steel bund with drain port and internal supports
- Moulded fibreglass mesh for drum support
- Alemlube 20m x ½" ID spring rewind oil hose reels
- Digital metered control guns, with drip trays
- Heavy duty 5:1 oil drum pump
- Tie down points for 205 drums
- Gantry frame is 100% Australian made
- Designed and welded to AS1554.1
- Bund designed and compliant with AS1940
- 2" BSP drain port for bund included

General Range Equipment:

- 348120 – 5:1 ratio drum pump
- HR90090 – 20m x ½" ID oil hose reel
- O30020 – Drip tray
- 365534 – Digital metered control valve
- 3-Bund gantry – Primary assembly
