Alemlube markets a range of fire extinguisher boxes essential for maintaining safety standards for plant, fleet and employees across all industry sites and transport sectors.

Extremely strong, durable, UV resistant and chemical resistant, each fire extinguisher box is manufactured from 100% recyclable polyethylene and incorporates securely fitted openings, either front or top loading.

Suitable for installation indoors and outdoors, two models are available to accommodate a 6kg fire extinguisher and two models to hold 9-12kg fire extinguishers.

Designed and manufactured to provide a wide range of fitting options, Series 70 and Series 83 fire extinguishers feature twin polycarbonate inspection windows and are ideal for installation on the back of a cab or on the side of a vehicle.

| SERIES | LOADING | CAPACITY | WINDOWS | MOUNTING |
|--------|---------|----------|---------|-----------------------|
| 65 | Top | 6kg | - | Truck / Trailer |
| 70 | Front | 6kg | Yes | Wall, Truck / Trailer |
