

## PRODUCT INFORMATION

DECEMBER 2017

# 20066N LED Cordless Workshop Light

The 20066N Cordless LED Workshop Light is the ideal portable workshop light due to its low heat output, stronger brightness, and high shock resistant TPR housing. The 20066N features a 3W COB high power super bright LED that emits exceptional light output, a 1W LED head spot light and is completely rechargeable.

The 20066N is convenient for hands free use with the additional benefit of a 360° fold away hanging hook for under bonnet or under car applications, a 150° folding body design and a magnetic base all combining to offer the ultimate in flexible positioning. A wall charger and an in-car charger are included for added charging convenience.

Battery charging is indicated when a red LED is visible. Charging is complete when the red LED is off and two green LEDs are on.

It is recommended that the 20066N LED cordless workshop light is recharged at least once every 30 days to keep the battery in good condition and ready for use at any time.

1W Head Spot Light

Highly Polished Reflector

3W COB LED
